

FOR IMMEDIATE RELEASE

The Engineers Joint Contract Documents Committee Launches E-Commerce Web Site

Alexandria, VA, May 14, 2010 – For the first time in its 35 year history, the Engineers Joint Contract Documents Committee (EJCDC) has created a centralized e-commerce website for its highly regarded standard construction contracts and documents at www.ejcdc.org. All parties to infrastructure projects and engineer lead construction projects can now more easily find and purchase the appropriate documents for their project needs.

In addition to offering a centralized point-of-purchase, the new website also provides visitors with summary information on recent legal and legislative activities of interest to Engineers in planning projects. The information is collected and provided by EJCDC member organizations and gathered from other source material to help educate document users.

Since 1975, EJCDC has developed and updated fair and objective standard documents that represent the latest and best thinking in contractual relations between all parties involved in engineering design and construction projects. EJCDC documents are the highest quality standard documents specifically written for infrastructure projects in the United States.

The Engineers Joint Contract Documents Committee (EJCDC) is a joint venture of four major organizations of professional engineers and contractors. Each of EJCDC's sponsoring organizations-NSPE, ASCE, ACEC and AGC- offer EJCDC documents on their online stores at a discount to organization-members.
